### **DESCRIPTION:**

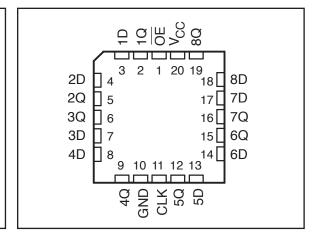

Potato Semiconductor's PO74G374A is designed for world top performance using submicron CMOS technology to achieve higher than 600MHz TTL /CMOS output frequency with less than 2.4ns propagation delay.

This dual Octal edge triggered D-type flip-flops are designed for 1.65-V to 3.6-V VCC operation.

Inputs can be driven from either 3.3V or 5V devices. This feature allows the use of these devices as translators in a mixed 3.3V/5V system environment.
